

ROAD MAP/DEV NOTES FOR ROKU

Roku is a streaming service, that allows users with its subscription, to watch movies, tv shows, music, and other entertainment on an internet-connected device.

Available across Android, iOS, or windows devices.

- Make the site user-friendly.
- Make sure that all key features like the settings, search button, and filters are easily accessible.
- Make sure to have consistent design throughout the pages.
- The app should be completely responsive and compatible with all devices.
- For kids, make it look more friendly and with fewer features.
- Create a database with a wide variety of options to select from.
- Use sass for the styling pages.
- The overall flow should be easy to follow.
- Use Vue or simil
